#DecarbHeat

The Forum that will bring together high-level policy makers, professionals from the heating and cooling industry and influencers from related sectors

— Brussels, May 3rd 2017 —

In the ambitious post-Paris COP21 world in which countries, cities and citizens are vying to keep global greenhouse gas emissions “well below 2 degrees Celsius”, the DecarbHeat Forum stands out as the first gathering of cross-sectoral companies, associations and institutions that believe in bridging the gap and connecting the heating/cooling and electricity sectors in the move towards zero CO2 emissions by 2050.

The DecarbHeat Forum includes insights from respected institutions, such as the International Renewable Energy Agency (IRENA), global corporate leaders like Philips, thought leaders from policy – like Claude Turmes, member of the European Parliament, and science, like the Fraunhofer Institute for solar energy systems as well as a plethora of companies and associations that believe in sending a joint message to lower carbon emissions more efficiently:

“A decarbonisation of society without a decarbonisation of heating/cooling is not possible. We have only 33 years to accomplish this goal and that means, we have to start now” says Martin Forsén, president of the European heat pump association and goes on “we thus encourage all bodies that support the vision of a 100% CO2 emission free society to join the DecarbHeat conference and initiative.”

The DecarbHeat Forum will include the annual Heat Pump City Award that will be presented by Céline Fremault, Brussels Capital Region Minister of Energy and Environment on May 11 at 7pm. This prestigious award identifies a leading European city that has integrated heat pumps in their respective energy system in innovative ways to bring cleaner energy to its citizens. Minister Fremault says:

A healthy and sustainable future is also the wish of the vast majority of European citizens. So as a representative of the people, I feel it to be my duty to give my full personal support to the DecarbHeat vision and to your initiative.

The two day #DecarbHeat Forum will take place at the Brussels Environment Agency headquarters (The BEL building) next to Tour&Taxis, and will include a tour of this zero emission building, high-level panels, the industry pledge signing ceremony with photo
opportunities and interview slots for media with the top international thought leaders on this historical occasion. See attached program for more details.
