

#EHPASTATS WEBINAR:

GET AN UPDATE ON THE EUROPEAN HEAT PUMP MARKET

24 JUNE – 16:00 – 17:00

Data of 2018 reveal a market growth of 12% compared to 2017. **Over the past four years, the European heat pump market has experienced double-digit growth!** With 11.8 million units installed across Europe, heat pump technology has quickly developed into a cornerstone of Europe's heat supply. Currently, heat pumps are heating slightly less than 10% of all buildings, but there is still a vast untapped potential to be unleashed. With their thermal and demand-side flexibility potential, heat pumps will be required in the new energy system to achieve the 2050 climate targets and offer an enthusiastic re-industrialisation project for the EU.

This webinar will be dedicated to presenting and interpreting 2018 market data from 21 European countries, with a specific focus on the biggest market in EU: France. Secondly, the webinar will explain EHPA's **On-line Stats Tool** and all its features. The user will learn how to extract market data and create related statistics and graphics easily. [Register here](#)

AGENDA

- 16.00 EHPA Market & Statistics: The heat pump engine steams**
Thomas Nowak, Secretary General of EHPA
- 16:20 How France has become the biggest heat pump market in Europe**
Valerie Lapagne, Vice-president of AFPAC
- 16.35 Stats Tool: How to use it**
Pascal Westring, Vocal Data
- 16.40 Questions & Answers**
