Volkswagen Group e-Mobility Strategy The Way to Zero

We are here to accelerate evolution with e-mobility for millions and not for millionaires

Responsibility taken

VOLKSWAGEN
AKTIENGESELLSCHAFT

33 billion €
(total invest without China)

26m EV's
(worldwide in 2030)

75 BEV
(in 2030)

> 36,000
(Charging Stations in EU in 2025)

Promises mostly fulfilled

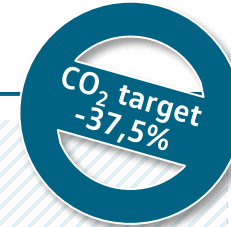

Zwickau

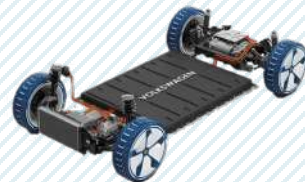

Emden

Hannover

Dresden

Production established

330 – 550 km
Range

Up to 125 kW
charging power

CO₂-neutral footprint

1,5 m MEB globally 2025

80% in 30 minutes
150-260 km

Approach

Full focus:
e-mobility
only available
technology to
reach **CO₂** targets

Retrograde target derivation based on the Paris Climate Agreement requires effective transformation planning and dedicated implementation

Impacts of the Paris climate targets on Volkswagen AG
