

The new European Commission: what's in it for the heat pump sector?

Main measures announced for the heat pump sector:

Electrification Action Plan

Supported by EHPA as a key action to boost heat pumps, alongside the Electrification Alliance.

Action Plan for Affordable Energy Prices

Welcomed by EHPA as electricity price should be no more than twice the price of gas.

Ending fossil fuel subsidies

To boost the domestic production of renewable energy. EHPA endorses the phase-out of fossil fuel subsidies as the main way to encourage the use and production of clean energy.

Citizens Energy Package

EHPA advocates for increased citizen participation in the energy transition.

Post-2030 framework

EHPA advocates for the ambitious target of reaching 60 million heat pumps by 2030 to drive long-term decarbonisation policies.

Clean Industrial Deal

EHPA supports a net-zero industry for Europe.

Industrial Decarbonisation Accelerator Act

EHPA champions industrial decarbonisation through industrial heat pumps.

Innovation Fund

EHPA supports the Innovation Fund and Social Climate Fund as essential instruments to encourage energy-efficient renovations with heat pumps.
